## OBJECTIVE

Seeking an opportunity to utilize my frontend development skills, and eye for design at a cutting edge technology company that produces awesome products and is constantly growing.

## WORK EXPERIENCE

### CauseForce, LLC

**September 2014 — Present**

Frontend Web Developer

- Redevelop old websites to use best modern practices, including: responsiveness, retina ready, and more
- Develop pixel-perfect websites from scratch using new branding ideas and design wireframes
- Configure site templates, site interactivity, and site functionality within Convio CRM for over twenty sites
- Update office development practices to create a more efficient developing environment for years to come

### Boxes, LLC

**August 2014 — September 2014**

Frontend Developer

- Created fully responsive, cross-browser compatible, retina ready, and user-friendly frontend interfaces
- Worked from design templates in photoshop, and developed pixel perfect replications using Bootstrap
- Connected plugins, fixed bugs, coded & commented cleanly for reuse, communicated with team

### Freelance

**July 2011 — Present**

Web Developer

- Create mock-ups so that client agrees with design aesthetic, and targets the appropriate audience
- Design, then develop, and lastly test website's interface and experience to ensure perfection for client
- Set up the website's hosting, domain name, email, and optimize for search engines
